DEPLICANT: Clinton, Gail M.

TITLE OF INVENTION: EXPRESSION OF HERSTATIN, AN ALTERNATIVE HER-2/NEU PRODUCT, IN C
TITLE OF INVENTION: EXPRESS EITHER PI8SHER-2 OR THE EGF RECEPTOR INHIBITS RECEPTOR
TITLE OF INVENTION: GROWTH
FILE REFERENCE: 49321-73
CURRENT APPLICATION WUMBER: US/10/302,663
CURRENT APPLICATION WUMBER: US 09/638,834
PRIOR FILING DATE: 2002-11-22
PRIOR PELICATION NUMBER: US 09/638,834
PRIOR FILING DATE: 2000-08-14
NUMBER OF SEQ ID NOS: 10
SEQ ID NOS: 10
SEQ ID NOS: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     varia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Applicants herein disclose Thr and Ser sequence variants at thi

Title:

Perfect score: 418

1 GAPSLLPRPAAVPVPLRMQP......VGRGPDPDAEVAVNLSRYEG 79

Scoring table: BLOSUM62

Gapop 10.0 , Gapext 0.5

Searched:

283366 seqs, 96191526 residues

Total number of hits satisfying chosen parameters: 283366

Minimum DB seq length: 0

Maximum DB seq length: 2000000000
```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 90 summaries

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 -i- PTM: The tandem 7 residues repeats can be highly phosphorylated.
The phosphorylation activates POL2.
The phosphorylation activates POL2.
MISCELLANBOUS: Three distinct zinc-containing RNA polymerases we found in eukaryotic nuclei: polymerase I for the ribosomal RNA precursor, polymerase II for the mRNA precursor, and polymerase III for 5S and tRNA genes.
-i- SIMILARITY: Belongs to the RNA polymerase beta' chain family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 -i- CATALYTIC ACTIVITY: N nucleoside triphosphate = N diphosphate

Mat. Biotechnol. 21:526-531(2003);

Le function: One of the essential components for the initiation of protein synthesis. Protein formylmethionyl-RNA from spontaneous hydrolysis and promotes its binding to the 30S ribosomal subunits.

Also involved in the hydrolysis of GTP during the formation of the 70S ribosomal complex (By similarity).

C. SUMCELIUTAR LOCATION: Cytoplasmic.

SIMILARITY: Belongs to the IF-2 family.
                                                                                                                                                             SEQUENCE FROM N.A.

C. FUNCTION: CIRCADIAN REGULATOR THAT MAY ACT AS A TRANSCRIPTION
EACTOR. BEHAVES AS A NEGATIVE ELEMENT IN CIRCADIAN TRANSCRIPTION
EACTOR. BEHAVES AS A NEGATIVE ELEMENT IN CIRCADIAN TRANSCRIPTIONAL
ELOOP. DOES NOT APPEAR TO BIND DNA, SUGGESTING INDIRECT.
TRANSCRIPTIONAL INHIBITION: EXPRESSION OSCILLATES WITH A 24 HR
HHYTHM IN THE SUPRACHIASMATIC NUCLEUS (SCW) AND THE MHOLE EYES.
COSCILLATIONS ARE MAINTAINED UNDER CONSTANT DARKNESS AND ARE
RESPONSIVE TO CHANGES OF THE LIGHT/DARK CYCLES. THERE IS A 4 HOUR
THE DELAY BETWEEN PERL AND PERZ OSCILLATIONS. THE EXPRESSION
ENTYHMAS APPEAR TO ORIGINATE FROM REITHA (BY SIMILARITY).
C. INDICTION: BY LIGHT (BY SIMILARITY).
C. INDICTION: BY LIGHT (BY SIMILARITY).
C. SIMILARITY: Belongs to the basic helix-loop-helix (bHLH) family of
C. SIMILARITY: Contains 1 PAS-associated C-terminal (PAC) domain.
